Hi Stephanie,

Attached please find a set of figures we discussed on the call on Tuesday:

1. 2,3,7,8-TCDD – 0.5 to 1.5' segment
2. Surficial concentrations of HMW and LWM PAHs and total DDx. We had these figures already created, but they are in a different format than the ones we presented on Tuesday. Let me know if these don't provide the info you need, we can edit or redo them
3. A figure showing access, developed from observations during the habitat survey. We didn't talk about this one specifically, but we thought it might be useful.

Please let me know if there are others I have missed, or if you'd like any edits to these.

Thank you,

Marcia
